Nothing More Significant of the Paper's Popularity.

They Were on Every Topic and They Kept the Editors Busy.

One of the surest signs of a paper's succes and popularity is the size of its daily mail, THE EVENING WORLD has not been slighted in this respect by the public. Since its inception it has been the recipient of more letters, on more varied topics, perhaps, than any other journal. The number of letters a day has been steadily increasing, until now it requires several clerks to sort them out properly, in order that they can be attended to every day.

These young men were nearly buried under the avalanche of letters that poured in yester-

Generally the letters needing the attention of the editor are brought to him by the clerks in large tin boxes. The tin boxes would not hold them all yesterday, so the boys dumped them into mail-bags, and carried them up to the editorial desk in solemn

The Eventso World is not complaining.
It likes this and only mentions the matter to w how the eyes of the public turn in its

For instance, the Gladstone puzzle, published Thursday afternoon, was solved correctly by nearly nine hundred people, who sent their solutions in by mail. The majority of them requested that their names be mentioued, but to grant that request would have necessitated publishing an edition of The Evening World for that purpose alone. The first ten who solved the puzzle correctly were named, as had been promised.

Many of the letters were quite interesting, as is the following:

Deuman Thompson and his "Old Homestead" are still at the Academy of Music, and the success of the piece is as great as ever.
